

Appleton Academy

Nursery Welcome Pack

Welcome to Appleton Academy. We are very pleased to be welcoming you and your child to our wonderful school. We are excited to meet you all and begin working with our new and returning families. We understand that starting school is an important milestone so we hope this booklet will provide you with the information you need to ensure a smooth and enjoyable start in September.

Meet the teachers

Miss Searle
Teacher

Mrs Smith
Nursery Nurse

The first week in school

This will be a staggered start with children starting on either Wednesday 8 or Thursday 9 September 2021. Home visits for our new children only will be on Tuesday 7 September. A letter along with the start date and home visit time has been posted to each family.

The first week allows the children to settle in, explore their new environment and get to know other children and their teachers. They will also learn about the routines of the day such as dinner time, snack time and carpet sessions where focused learning takes place throughout the day.

Exciting and fun activities

Structure of the day

8.35am – 8.45am	Good morning and registration Days of the week song/ calendar / weather chart
8.45am – 9.00am	Literacy teaching input – topic based
9.00am – 10.00am	Free flow – learning and playing in the areas of provision Teacher/support staff working with children on a focus activity
10.00am – 10.15am	Phonics input
10.15am – 11.00am	Free flow – learning and playing in the areas of provision Teacher/support staff working with children on a focus activity
11.00am – 11.20am	Maths input
11.20am – 11.30am	Story time / rhythm and rhyme
11.30am – 12.15pm	Lunch for children staying all day
12.15pm – 12.25pm	Good afternoon and registration Days of the week song/ calendar / weather chart
12.25pm – 12.40pm	Literacy teaching input – topic based
12.40pm – 1.40pm	Free flow – learning and playing in the areas of provision Teacher/support staff working with children on a focus activity
1.40pm – 1.55pm	Phonics input
1.55pm – 2.40pm	Free flow – learning and playing in the areas of provision Teacher/support staff working with children on a focus activity
2.40pm – 3.05pm	Maths input Story time / rhythm and rhyme
For children staying all day: They will join in with each session but may work separately with an adult on some occasions.	

Preparing your child for school

Starting school is a very special time for you and your child and there are lots of things you can do to help prepare them. Helping your child to be independent would be a huge benefit for when they start school. Here are some of the things you could focus on in preparation for September:

- Fastening buttons and zips
- Dressing themselves
- Using the toilet independently and asking for help if they need it
- Clean themselves after using the bathroom
- Washing and drying own hands
- Tidying up after themselves
- Recognising their written name
- Use cutlery to feed themselves and open packets and cartons
- Share toys and know to take turns
- Sing nursery rhymes
- Count to 10
- Listen to and follow simple instructions
- Practise drawing small lines and anti-clockwise circles in preparation for writing letters

Other ways to help prepare your child for school will include getting them into a good routine and being consistent with times for going to and getting out of bed. Allow plenty of time to eat breakfast so they start off their day feeling full and happy. Most importantly, we understand that saying goodbye at the gate may be an upsetting moment for children and parents, so please try to keep this a positive experience by telling your child to have a wonderful day, that you will be back soon and give a huge smile.

Areas of learning

Each day our children will take part in a maths, literacy and phonics session.

- Maths – children will learn all about numbers, shapes and measuring. They will search for shapes in the environment, use familiar songs to help them count and recognise numbers.
- Literacy – children will explore stories and learn about characters and story lines. They will practise their mark making skills using different writing tools such as chalk, paint brushes and pencils.
- Phonics – children will begin to learn about different sounds in the environment and through using instruments. When they are ready, children will move onto letters sounds.

Early Years aims to support your child to develop in 7 very important areas of learning which are the foundations for continued learning through school.

The 7 areas of learning are:

- Communication and Language
- Personal, Social and Emotional Development
 - Physical Development
 - Literacy
 - Maths
 - Understanding the World
 - Expressive Arts and Design

The 3 areas listed in blue are considered the prime areas. These are important because they lay the foundations for children's success in all other areas of learning and of life.

Personal, Social and Emotional Development

- Support the children in making new friends and to share their toys, taking turns and waiting patiently.
- Explain that winning, losing and taking part are all important. Play games that allow your child to feel the excitement of winning and to explore the emotions of losing.
- Ask your child how they are feeling, can they explain why? How do we know if someone is feeling sad/happy/angry etc. Children need to understand how they and others are feeling and be able to talk about the reasons.
- Allow your child to make their own decisions and give them time to think about it? What they would like for breakfast, which coat to wear and why.
- Encourage your child to think for themselves so when they continue to ask 'why', simply ask them 'why do you think' or 'can you explain why'.
- Give your child small tasks to complete so they begin to enjoy the responsibility of carrying them out.
- Encourage your child to talk about themselves in a positive way, this could include discussing things they are good at or things they would like to be better at.

Physical Development

- Catching and throwing games will help your child to develop gross motor movement and control and hand-eye coordination.
- Help your child to gain some control in their small movements by playing with play dough, threading beads, colouring activities.
- Practise using scissors, cutting following lines and shapes.
- Begin to practise holding and using a pencil. Although they may not be able to write just yet, drawing and making different marks are a starting point that will develop into letters, words and sentences. If you are practising writing letters, please form lower case letters first (capital for the first letter in their name only)
- Support in the development of large movements by visiting the park or woods so children can explore, climb, travel around, jump, move about in different ways.
- Talk about healthy eating, which foods are good and not so good for our bodies, why some should be eaten as a small treat. Why is exercise important? What can it do for our bodies?

Communication and Language

- Encourage good listening when having conversations and reading stories, ask your child to respond and talk about when has been said/read.
- Give your child tasks and activities that can help them to develop and challenge their attention skills for a short time.
- Each day, encourage your child to follow simple instructions starting with one simple instruction such as 'put your shoes away'. This could then be extended to a 2-part instruction such as 'put your shoes away and wash your hands'. Simon Says is a fantastic game to play to support your child in listening to and completing instructions given.
- Asking your child questions and encouraging them to ask you questions is a fantastic way to develop speaking and listening skills. Asking them to explain why or give reasons will help to develop their understanding.
- As you are sharing a story, allow your child to see your finger move across the words as you read left to right, carefully turning pages, talking about what might happen next, joining in with phrases in a story they are familiar with. Talk about the title, the author and illustrator, the characters, setting and story line.
- Encourage children to read a story to you. They can use the pictures to help and their knowledge of the story.
- Talk about places you have visited and what you did there. Look at pictures to help remind the child of the visit and what fun they had.
- Finally, don't be afraid to explore new words and vocabulary with your child, discuss the meaning of new words.

Other information

Arriving to school on time is of the utmost importance for many reasons. Often, children just starting school will begin to form friendships at the gate as they wait to come into school, and this can be very helpful for those who may struggle at the beginning to say goodbye to their grown-ups. We begin our learning in school straight away and children arriving late will often miss this vital part of their learning and development. You as parents give your children the message that school is important.

For our children staying all day, we encourage a healthy meal so please ensure their lunch box is filled with a variety of healthy foods. Here are some examples of what a healthy lunch box might look like.

As we encourage healthy eating, please don't bring fizzy drinks, chocolate bars (chocolate biscuits that accompany a sandwich such as a 2 finger kitkat are allowed) or any sweets. As we have children with nut allergies, please do not place any nut products in the lunch box. The NHS change4life website offers healthy lunch box recipe ideas.

Milk is free and available for each child in Nursery. If your child doesn't enjoy milk, water will be offered or they can drink from their water bottle during snack time. The snack is usually fruit, raw vegetables or raisins.

Final thoughts!

Don't forget to look out for an email invite to 'Evidence Me' where you can view your child's learning journey online, discover the observations the staff have taken and even add your own to show the wonderful learning that takes place at home.

We look forward to welcoming you all in September. We hope you have a wonderful summer.

Thank you
