

Summer School Report

Appleton Academy delivered a short summer school programme which included education and enrichment activities.

Pupils from Year 6 were invited to attend the summer school in preparation for transition to Year 7. Learning was active with real life application for learning across the core subjects. Pupils were able to enjoy practical Art and DT activities as well as PE and play.

The Year 10 summer school took place in both knowledge and skills based workshops. The sessions provided opportunities to strengthen knowledge and understanding of the taught curriculum that was applied to exam style questions in preparation for their GCSE examinations in June 2022.
