

Dear Parent/Carer

You are receiving this letter as your child is accessing our Bedrock Learning Programme. This is designed to improve their reading fluency and comprehension through a balance of vocabulary acquisition and grammatical development. Students have been accessing this for an hour per week during dedicated sessions as part of curriculum time and this will continue to be the case for the remainder of the year to ensure they are fully supported in improving their reading.

To help your child with this, we would like to provide information on how Bedrock can be accessed from home to further encourage reading fluency. The average lesson on Bedrock takes only 20 minutes and just one extra lesson a week could really help to boost reading ability over an extended period of time.

To access Bedrock from home, follow the visual guide and instructions below:

1. Google bedrock learning and click 'log in'

2. Click on 'Office 365' – at this point, students can use the same login as they would use for IT lessons to log on to the computer.

What would you like to learn today?

### Vocabulary

Learn the academic language you need to succeed.

Let's go

### Grammar

Learn about the way we arrange language to show meaning.

Let's go

### Mapper

Learn the language across your school's curriculum.

Let's go

Ac

3. Click on "Let's Go" for either Vocabulary or Grammar. This will then open up the lessons available for the student to access from home. They should aim to get one extra lesson completed at home.

We hope this enables you to support your children at home with their reading fluency and comprehension but we would encourage you to get in touch with any queries via [info@appletonacademy.co.uk](mailto:info@appletonacademy.co.uk).

Yours faithfully

Mr Matthew Law  
Assistant Head of English
